

EXP 6 : ARDUINO TO 16x2 LCD DISPLAY USING PROTEUS

OBJECTIVE:

To write an Embedded C program to interface Arduino Uno and 16×2 LCD display using Arduino Uno and Proteus.

CODE:

```
#include <LiquidCrystal.h>
```

```
LiquidCrystal lcd (7, 8, 9, 10, 11, 12);
```

```
// your PWM numbers may be different
```

```
void setup() {  
  lcd.begin(16, 2);  
  lcd.print("put your message here");  
}
```

```
void loop () {  
  for (int i = 0; i<13; i++)  
  }  
  lcd.scrollDisplayLeft();  
  delay(700);  
}
```

OUTPUT:
